hello-world

HTML5 + CSS3 + JavaScript

Project Rules

You need to follow UWGB "do your own work" rules on this project. No copied code from other students or online.

- You can HTML code, CSS code, or JavaScript code that you create

- You can use your own images or images that are not copyright protected. **Copyright violating images may result in a failing grade.**

- All HTML, CSS, and JavaScript files **must be validated**,

  - HTML: https://validator.w3.org

  - CSS: https://jigsaw.w3.org/css-validator/

  - JavaScript: https://jslint.com

Project Specifications

1. Make the Project "toggle" when clicked back and forth between the original state and the "Hello, World" state.

2. The screen can display whatever you want in the pre-clicked state. Be original.

3. Upon clicking, call a JavaScript **function** - this function should copy the existing content into **variables** and swap the content as a "toggle".

4. Make it your own. Make it look and work great!
